

# **PestGuard LLC/Husker Pest & Termite**

## **German Roach Treatment Instructions**

- 1) If you have a large amount of personal items on top of your refrigerator, please remove them and place them on a table or other area away from the kitchen counter tops.
- 2) Please pick up kitchens and bathrooms and make sure they are free of clutter, such as clothing on the floors, unswept floors, and dishes dirty in the sink or on the counters.
- 3) Please DO NOT treat for German Roaches on your own by using over-the-counter insecticides such as Raid. These sprays could be counter-productive to the treatment we perform for you.
- 4) Please thoroughly wash and clean all areas in which roaches were found to be present, such as underneath refrigerators, underneath sinks, in cabinets, in drawers, around furniture, and around closet doors and other storage areas.
- 5) Vacuum or remove ALL dead roaches found in and around the areas listed above....or any other areas you may find dead ones in and around your home.
